SASHA VILLAIN

End-of-Studies Internship — Project Management & Energy Innovation

Lille, France | +33 7 83 53 69 73 | sasha.villain@student.junia.com | linkedin.com/in/sasha-villain | Relocation to Singapore

Final-year Engineering Master student at JUNIA HEI specialized in Electrical Engineering and Energy Transition. Currently leading the technical design of an autonomous energy system for a 17,000 m² sports complex with SB Energy, combining rooftop PV and battery storage. Seeking a 6-month end-of-studies internship starting February 2027 in Singapore to leverage analytical rigor, cost estimation capabilities, and cross-functional team coordination on smart infrastructure projects.

WORK EXPERIENCE

Pricing Engineering Intern June 2026 – September 2026

Eiffage Énergie Systèmes, Lille, France

- Engineered cost estimation and comprehensive technical proposals for commercial and public tenders valued up to €700,000, contributing to securing a winning public contract.
- Collaborated with major institutional and corporate stakeholders, including Métropole Européenne de Lille (MEL) and Auchan Retail, ensuring strict compliance with technical specifications (CCTP).
- Standardized bill of quantities and financial pricing models using specialized estimation software QuickDevis and QuoterPlan.
- Calculated cable cross-sections, sized low-voltage distribution boards, and conducted photometric design studies using Dialux.
- Negotiated procurement pricing and technical packages with 5 strategic suppliers to protect project profit margins.
- Audited active sites alongside Project Managers to verify execution feasibility against initial engineering estimates.

Sales & Operations Assistant August 2024 – September 2024

Printemps, Lille, France

- Assisted a daily flow of over 50 customers during peak hours in a fast-paced retail environment.
- Handled stock inventory tracking, replenishment routines, and customer parcel processing with zero discrepancies.

PROJECTS & LEADERSHIP

Project Manager — Autonomous Sports Complex Energy System October 2026 – December 2026

Academic Consultancy Project for SB Energy | JUNIA HEI, Lille, France

- Directing a multidisciplinary engineering team of 6 students (Electrical, Civil, IT) acting as technical consultants.
- Designing the multi-source energy system for a 17,000 m² facility: rooftop PV, car-park canopies, and battery energy storage.
- Evaluating collective self-consumption potential, modeling energy flows, and assessing financial viability for surrounding consumers.
- Establishing project management governance: work breakdown structures (WBS), risk tracking, and executive milestone reporting.

Project Manager — River Transport Decarbonization September 2025 – May 2026

JUNIA HEI Academic Project, Lille, France

- Led an engineering study dedicated to decarbonizing inland waterway navigation through electrical hybridization.
- Sized lithium battery storage systems based on operational vessel duty cycles and dynamic power demand.
- Modeled onboard electrical architecture and proposed energy efficiency solutions to extend battery endurance.

Founder & Campaign Lead — Student Sports Association April 2025 – March 2026

Student Association, Lille, France

- Founded and coordinated a candidate list of 40 students for the official campus sports board election.
- Administered a €15,000 operating budget, led external partner negotiations, and organized large-scale campus events.
- Set project schedules, led weekly steering committees, and resolved team logistical roadblocks.

EDUCATION

Master of Science in Electrical Engineering & Energy Transition September 2024 – October 2027

JUNIA HEI, Lille, France

- Core coursework: Smart grids, microgrids, renewable power integration, energy storage systems, PMO, power systems.
- International experience: Independent 2-month solo travel and cultural immersion across Southeast Asia (Thailand).

Intensive Preparatory Classes (CPGE - PSI) September 2022 – June 2024

JUNIA HEI, Lille, France

- Advanced curriculum in Mathematics, Physics, and Engineering Sciences. Elective in Theater and Public Speaking.

SKILLS & CERTIFICATIONS

Project Management & PMO: Planning, Requirements Analysis, Tender & Bid Management, Cost Estimation, Stakeholder Management, Agile & Waterfall.

Technical & Digital Tools: QuickDevis, QuoterPlan, Dialux, AutoCAD, MATLAB, Python, Power BI, Homer Energy, MS Office (Excel, PowerPoint).

Certifications: Schneider Electric Sustainability School (Understanding Climate Change & Global Response), TASK (Sustainability), SST (First Aid & Safety), PIX, Cambridge Advanced.

LANGUAGES & INTERESTS

Languages: French (Native), English (B2/C1), Spanish (B1).

Interests: Theater and dramatic improvisation (5 years), trail running, hiking, astronomy, autonomous travel.
